

A STUDY BY ALEX LUPUYEV

FIELD WATER UNIT

AN ALTERNATIVE APPROACH TO WATER SUPPLY EXCHANGE EFFICIENCY
FOR RECONNAISSANCE UNITS STATIONARY IN FIELD

Water availability at any time “instant refueling”, replacing the water while walking without lowering equipment, water amount is controlled, faster water distribution

Handle for quick retrieval, can be assembled upside down (for left-handed use).

Each time handle is pulled one disposable bag is released for use.

One connector per each bag, soldered to help easier slide through the canal.
